

SMW Consultants, Ltd.
Writing & Consulting Medical Research
Kylliäisentie 9, FIN-21620 Kuusisto, FINLAND.

SMW Mission Statement

The Company has a Vision:

- 📌 Valuable research does not always get proper attention and publicity

High impact medical research elaborates new data and results that (in a long run) can be applied for the benefit of the patients.

The critical issues in medical research include: a) study design, b) adequate funding, c) statistical analysis and interpretation of the results, and d) writing a clear and informative research report. A substantial proportion of potentially important medical research suffers from weaknesses in one or more of these aspects, losing the cutting edge of getting proper attention that it might deserve.

The Company has a Mission:

- 📌 Quality and impact of published medical research can be improved

SMW Consultants was established to target the above critical issues of medical research by providing expert and non-standard solutions to specific demands of academic researchers and other organisations asking for assistance in:

- Study Design
- Research Funding
- Statistical Analysis and Interpretation of Results
- Writing Scientific Reports

The Company Respects the Values:

- 📌 Towards excellence by expertise

SMW has committed to endeavour towards this goal by respecting time-honoured values of research ethics, confidentiality, client service, and mutual respect.

The leading principle in all our activities is to make the most of the power of teamwork.

Kari Syrjänen, MD, PhD, FIAC
President & CEO
